

Super Admin Dashboard

- User Management: View, suspend, delete users, export user data
- SSM Verification: Review and approve/reject employer SSM documents
- Payment Management: View all transactions, refunds, payment disputes
- Pricing Plans: Create/edit job posting packages, subscription plans, and team member pricing
- Ad Management:
 - Review and approve banner ad creatives
 - Manage ad slot inventory (homepage positions)
 - Set ad pricing
 - Monitor ad performance across platform
- Boost Settings: Configure boost prices and durations
- Email Template Management: Create/edit automated email templates
- Reports & Analytics:
 - Revenue Report: Job posts, tokens, subscriptions, team seats (by date range)
 - User Activity Report: Sign-ups, active users, engagement metrics
 - Job Performance Report: Most viewed jobs, highest application rates
 - Employer Performance Report: Top employers, subscription renewals
 - Export to PDF/Excel
- Platform Analytics: Total users, jobs posted, applications, revenue, ad revenue, team members
- Content Moderation: Flag inappropriate content (jobs and ads)
- System Settings: Email templates, payment gateway, platform rules, notification settings
- Audit Logs: Track all admin actions for security and compliance

1. System Overview

A three-tier job seeking platform connecting employers with job seekers, managed by super administrators. Built specifically for the Malaysian market with SSM verification, local payment methods, and PDPA compliance.

📌 MVP Scope: This document covers both MVP (Phase 1) and future enhancements (Phase 2). Phase 2 items are clearly marked throughout.

2. User Roles & Permissions

Super Admin

- Full platform access and control
- Manage all users (employers and job seekers)
- Platform settings and configurations
- Analytics and reporting across all users
- Content moderation (jobs, profiles)
- Subscription/payment management
- System logs and security monitoring

Employer

- Company profile management
- SSM verification required (must verify before posting jobs)
- 1 free job post upon SSM approval (one-time)
- Payment required for additional job posts (unless subscribed)
- Unlimited job posting for subscribers
- Team Management:
 - Add/remove team members (employees)
 - First user (owner) included free
 - Additional users require payment (per user/month)
 - Assign roles and permissions to team members
 - Manage team member access to jobs and applications
- Post/edit/delete job listings
- Boost job listings (featured, urgent, highlighted)
- Purchase homepage banner ads for company/job visibility
- Search and filter job seeker profiles
- Application management (review, shortlist, reject)
- Communication with applicants
- Interview scheduling
- Reporting and analytics (views, applications, ad impressions)
- Subscription plan management
- Payment history and invoices

Team Member (Interviewer/Recruiter)

- Limited access based on permissions set by employer
- View assigned job applications
- Review and shortlist candidates
- Add notes to applications
- Schedule interviews
- Communicate with candidates (if permitted)
- Cannot manage billing or company settings
- Cannot add other team members

Job Seeker

- Personal profile and resume management
- Job search with filters
- Apply to jobs
- Save/bookmark jobs
- Track application status
- Communication with employers
- Profile visibility settings
- Skill assessments (optional)

3. Core Features by Module

Authentication & Registration

- Email/password registration
- Social login (Google, LinkedIn)
- Email verification
- Password reset
- Two-factor authentication (optional)
- Role selection during signup
- SSM verification for employers (upload SSM certificate + manual review)

Super Admin Dashboard

- User Management: View, suspend, delete users
- SSM Verification: Review and approve/reject employer SSM documents
- Payment Management: View all transactions, refunds, payment disputes
- Pricing Plans: Create/edit job posting packages, subscription plans, and team member pricing
- Ad Management:
 - Review and approve banner ad creatives
 - Manage ad slot inventory (homepage positions)
 - Set ad pricing
 - Monitor ad performance across platform
- Boost Settings: Configure boost prices and durations
- Platform Analytics: Total users, jobs posted, applications, revenue, ad revenue, team members
- Content Moderation: Flag inappropriate content (jobs and ads)
- System Settings: Email templates, payment gateway, platform rules
- Reports: Generate custom reports (revenue, transactions, user activity, ad performance)

Employer Dashboard

- Company Profile: Logo, description, location, website, size
- SSM Verification Status:
 - Upload SSM certificate (PDF/image)
 - Enter SSM registration number
 - View verification status (pending, approved, rejected)
 - Restrictions: Cannot post jobs until SSM verified
- Team Management:
 - View all team members
 - Add new team members (via email invitation)
 - Set roles and permissions (admin, recruiter, interviewer, viewer)
 - Assign team members to specific jobs
 - View team member activity logs
 - Remove/deactivate team members
 - Billing: First user free, RM 49/month per additional user
- Payment & Credits:
 - View available boost tokens and ad tokens
 - View free job post status (used/available)
 - View active team member count and monthly cost
 - Purchase individual job posts (pay-per-job)
 - Purchase job post bundles
 - Purchase boost token packages

- Purchase ad token packages
- Add/remove team member seats
- Subscribe to monthly/annual plans (unlimited job posting + tokens)
- Payment history and invoices
- Payment methods (credit card, FPX, e-wallets)
- Job Management:
 - Create job:
 - First job FREE (one-time after SSM approval)
 - Additional jobs require payment OR active subscription
 - Subscribers get UNLIMITED job posting
 - Assign jobs to specific team members
 - Edit/delete jobs
 - Job status (active, paused, closed)
 - Job Boost Options (requires boost tokens):
 - Featured (appears at top of search results with badge) - 1 boost token
 - Urgent Hiring (red "Urgent" badge, priority listing) - 1 boost token
 - Highlighted (colored background, stands out in list) - 1 boost token
 - Combo boosts (all 3 together) - 2 boost tokens (save 1 token)
- Homepage Advertising (requires ad tokens):
 - Purchase banner ad slots on main page
 - Choose ad duration (7 days, 14 days, 30 days)
 - Top Banner: 3 ad tokens (7 days), 5 tokens (14 days), 8 tokens (30 days)
 - Sidebar Banner: 2 ad tokens (7 days), 3 tokens (14 days), 5 tokens (30 days)
 - Featured Company: 4 ad tokens (30 days)
 - Upload banner creative (size specifications provided)
 - Preview ad placement
 - View ad performance (impressions, clicks, CTR)
 - Link to specific job or company profile
- Applicant Tracking System (ATS):
 - View applications
 - Filter by status (new, reviewed, shortlisted, rejected)
 - Add notes to applications
 - Schedule interviews
 - Kanban Board View:
 - Drag-and-drop candidates between stages
 - Columns: New → Screening → Interview Scheduled → Interviewing → Offer → Hired/Rejected
 - Quick actions on cards (schedule interview, send message, add notes)
 - Color-coded priority tags
 - Filter by job position
 - Search candidates within board
 - Assign applications to team members
- Search Candidates: Filter by skills, experience, location
- Analytics:
 - Job views, application rate, time-to-hire
 - Boost performance (views increase, engagement)
 - Ad campaign metrics (impressions, clicks, conversions)
 - Team member performance (applications reviewed, interviews scheduled)

Job Seeker Dashboard

- Profile Management:
 - Personal info (name, email, phone, location)
 - Resume upload (PDF/DOC) with auto-parsing
 - Work experience
 - Education
 - Skills and certifications
 - Portfolio links
 - Profile completion percentage (with tips to improve)
 - Profile visibility settings (public, private, hidden from specific companies)
- Job Search:
 - Search by keyword, location, salary, job type
 - Advanced filters (experience level, company size, industry)
 - Sort by relevance, date, salary
 - Boosted jobs appear prominently (featured badge, urgent tag, highlighted)
 - Save searches (get alerts when matching jobs posted)
 - Location radius filter (within 5km, 10km, 25km, etc.)
- Homepage:
 - Latest jobs feed
 - Recommended jobs based on profile
 - Banner ads from employers (company promotions, featured jobs)
 - Trending companies
- Applications:
 - One-click apply
 - Track application status with timeline
 - View application history
 - Withdraw application (before employer reviews)
 - Application notes (personal reminders)
 - Success rate metrics
- Saved Jobs: Bookmark jobs for later
- Alerts & Notifications:
 - Email/push notifications for matching jobs
 - Notification preferences:
 - Job recommendations (instant, daily digest, weekly)
 - Application updates (instant)
 - Interview reminders (instant)
 - Marketing emails (opt-in/out)
 - SMS notifications (opt-in/out)
- Dashboard Analytics:
 - Profile views this month
 - Applications sent
 - Application response rate
 - Interview invitations received

Matching & Recommendations

- AI-powered job recommendations for seekers:
 - Based on profile skills, experience, location
 - Job title matching and similar role suggestions
 - Learning from application patterns
- Candidate recommendations for employers:

- Skills matching against job requirements
 - Experience level compatibility
 - Location proximity
- Match score calculation (0-100%):
 - Skills match (40%)
 - Experience years match (20%)
 - Location proximity (15%)
 - Salary expectation vs offer (15%)
 - Industry/sector match (10%)
- Search Algorithm:
 - Elasticsearch for full-text search
 - Fuzzy matching for typos
 - Synonym support (e.g., "developer" = "programmer")
 - Location radius search (geospatial queries)
 - Boost recent jobs in relevance scoring

Kanban Board (ATS)

- Drag-and-drop interface for moving candidates through hiring stages
- Stages: New → Screening → Interview Scheduled → Interviewing → Offer → Hired/Rejected
- Candidate Cards Display:
 - Profile photo
 - Name and job title
 - Match score
 - Days since application
 - Priority tag
 - Quick action buttons
- Board Features:
 - Filter by job position
 - Search candidates
 - Bulk actions (move multiple candidates, send bulk emails)
 - Timeline view (see application history)
 - Activity log per candidate
- Stage Automation (optional):
 - Auto-send email when moved to interview stage
 - Auto-update job seeker's application status
 - Reminder notifications for pending interviews

Communication System

- In-platform messaging between employer and job seeker
- Email notifications with templates:
 - Application received (to job seeker)
 - Application status changed (to job seeker)
 - Interview scheduled (to both parties)
 - Job offer extended (to job seeker)
 - New matching job posted (to job seeker)
 - New application received (to employer)
- Interview scheduling with calendar integration (Google Calendar, Outlook)
- Video interview links (Zoom, Google Meet integration)

- Automated stage-based emails (e.g., "Your application is now in interview stage")
- Email preferences center (users can control frequency and types)

Notifications

- Application status updates (auto-sent when stage changes)
 - New job alerts
 - Interview reminders (24 hours before, 1 hour before)
 - Message notifications
 - Profile view notifications
 - Kanban stage change notifications (for job seekers)
 - Notification Delivery Channels:
 - In-app notifications (bell icon with count)
 - Email notifications
 - SMS notifications (for urgent: interview reminders)
 - Push notifications (mobile web/apps)
 - Notification Preferences (user-controlled):
 - Frequency (instant, daily digest, weekly digest, off)
 - Channel preferences (email, SMS, push)
 - Specific notification types on/off
-

4. Database Schema (Core Tables)

Users

- user_id (PK)
- email
- password_hash
- role (super_admin, employer, team_member, job_seeker)
- created_at
- last_login
- status (active, suspended, deleted)

Employers

- employer_id (PK)
- user_id (FK)
- company_name
- company_logo
- company_description
- industry
- company_size
- website
- location
- ssm_number
- ssm_certificate_url
- ssm_verification_status (pending, approved, rejected)
- ssm_verified_at

- ssm_verified_by (FK to Super Admin)
- ssm_rejection_reason
- free_job_post_used (boolean, default: false)
- free_job_post_granted_at
- team_member_count (includes owner)
- team_member_limit (based on payment)

Team_Members

- team_member_id (PK)
- employer_id (FK)
- user_id (FK)
- role (admin, recruiter, interviewer, viewer)
- permissions (JSON: can_post_jobs, can_review_applications, can_schedule_interviews, can_message_candidates, can_view_analytics)
- invited_by (FK to Users)
- invited_at
- status (pending_invitation, active, inactive)
- last_active_at

Team_Member_Job_Assignments

- assignment_id (PK)
- team_member_id (FK)
- job_id (FK)
- assigned_by (FK to Users)
- assigned_at

Job_Seekers

- seeker_id (PK)
- user_id (FK)
- first_name
- last_name
- phone
- location
- location_lat (for radius search)
- location_lng (for radius search)
- resume_url
- resume_parsed_data (JSON: extracted skills, experience, education)
- profile_summary
- experience_years
- desired_salary_min
- desired_salary_max
- profile_completion_percentage
- profile_visibility (public, private, hidden_from_companies)
- last_active_at
- job_search_status (actively_looking, open_to_opportunities, not_looking)

Jobs

- job_id (PK)
- employer_id (FK)
- title
- description
- requirements
- salary_min
- salary_max
- location
- location_lat (for radius search)
- location_lng (for radius search)
- job_type (full-time, part-time, contract, remote)
- experience_level
- status (active, paused, closed, expired)
- is_featured (boolean)
- is_urgent (boolean)
- is_highlighted (boolean)
- boost_expires_at (when boost ends)
- boost_tokens_used (number of tokens consumed)
- created_at
- expires_at (30 days from creation, renewable)
- last_renewal_reminder_sent_at
- views_count
- applications_count
- paid (boolean)
- transaction_id (FK, tracks which payment unlocked this job post)

Applications

- application_id (PK)
- job_id (FK)
- seeker_id (FK)
- cover_letter
- status (new, screening, interview_scheduled, interviewing, offer_extended, hired, rejected, withdrawn)
- kanban_stage (new, screening, interview_scheduled, interviewing, offer, hired, rejected)
- stage_changed_at
- priority (low, medium, high)
- applied_at
- updated_at
- withdrawn_at (if withdrawn by job seeker)
- withdrawal_reason (optional text)
- employer_notes
- seeker_notes (personal notes, not visible to employer)
- assigned_to (FK to Team_Members, which team member is handling this application)

Skills

- skill_id (PK)
- skill_name

Seeker_Skills (many-to-many)

- seeker_id (FK)
- skill_id (FK)
- proficiency_level

Job_Skills (many-to-many)

- job_id (FK)
- skill_id (FK)
- required (boolean)

Messages

- message_id (PK)
- sender_id (FK to Users)
- receiver_id (FK to Users)
- job_id (FK, optional)
- message_text
- sent_at
- read (boolean)

Saved_Jobs

- seeker_id (FK)
- job_id (FK)
- saved_at

Saved_Searches

- search_id (PK)
- seeker_id (FK)
- search_name (e.g., "Senior Developer Jobs in KL")
- search_query (JSON: keywords, location, filters)
- alert_frequency (instant, daily, weekly, off)
- created_at
- last_alerted_at

Notification_Preferences

- user_id (PK, FK)
- email_job_alerts (boolean)
- email_application_updates (boolean)
- email_messages (boolean)
- email_marketing (boolean)
- email_frequency (instant, daily, weekly)
- sms_enabled (boolean)
- sms_interview_reminders (boolean)
- push_enabled (boolean)
- updated_at

User_Notifications

- notification_id (PK)
- user_id (FK)
- notification_type (job_alert, application_update, interview_reminder, message, etc.)
- title
- message
- link_url
- is_read (boolean)
- created_at

Email_Templates

- template_id (PK)
- template_name (application_received, interview_scheduled, job_offer, etc.)
- subject
- body_html
- body_text
- variables (JSON: list of placeholders like {{candidate_name}}, {{job_title}})
- is_active (boolean)

Payment_Plans

- plan_id (PK)
- plan_name (e.g., "Single Job Post", "5 Job Bundle", "10 Boost Tokens", "Professional Subscription", "Additional Team Member")
- plan_type (pay_per_job, job_bundle, boost_tokens, ad_tokens, subscription, team_member_seat)
- price (MYR)
- job_quota (number of jobs for bundles, "unlimited" for subscriptions, null for token packages)
- boost_tokens (number of boost tokens included, null if not applicable)
- ad_tokens (number of ad tokens included, null if not applicable)
- team_member_seats_included (for subscriptions, null for other types)
- duration_days (for subscriptions, null for one-time purchases)
- features (JSON: unlimited posting, priority support, ad position, etc.)
- is_active (boolean)
- created_at

Transactions

- transaction_id (PK)
- employer_id (FK)
- plan_id (FK)
- amount (MYR)
- payment_method (credit_card, fpx, e-wallet)
- payment_gateway_ref
- status (pending, completed, failed, refunded)
- created_at
- completed_at

Employer_Credits

- employer_id (FK)
- boost_tokens_available
- ad_tokens_available
- subscription_plan_id (FK, null if no active subscription)

5. User Flows

Job Seeker Flow

1. Sign up → Email verification → Complete profile
2. Upload resume (auto-parsed to extract skills, experience)
3. Set job preferences (location, salary, job type)
4. Set notification preferences (how often to receive alerts)
5. Browse jobs / Search with filters
6. Save searches for recurring alerts
7. View job details (with match score %)
8. Apply (with optional cover letter)
9. Track application status with timeline view
10. Withdraw application if needed (before employer reviews)
11. Receive interview invitation
12. Schedule interview (sync to calendar)
13. Communicate with employer
14. Receive offer or rejection
15. View analytics: profile views, application success rate

Employer Flow

1. Sign up → Email verification → Complete company profile
2. Upload SSM certificate + Enter SSM registration number
3. Wait for Super Admin approval (account in "pending verification" state)
4. Receive approval notification → Account fully activated + 1 FREE job post granted
5. Post first job FREE (fill details and publish)
6. Optional: Add team members:
 - Send email invitations to employees
 - Set their roles (admin, recruiter, interviewer, viewer)
 - Set permissions (what they can access/do)
 - First user (you) is free
 - Each additional user: RM 49/month (or included in subscription)
 - Complete payment for additional users
7. For additional jobs, choose payment option:
 - Pay RM 99 per job (pay now)
 - Buy job bundle (e.g., RM 450 for 5 jobs, pay upfront)
 - OR subscribe for UNLIMITED job posting + included team seats (RM 499-1999/month)
8. Complete payment for additional jobs (if not subscribed)
9. Fill job details and post
10. Assign jobs to team members (if you have a team)
11. Optional: Boost job using tokens (if you have tokens):
 - Featured badge (1 boost token)
 - Urgent hiring tag (1 boost token)
 - Highlighted background (1 boost token)

- Or combo boost (2 boost tokens)
- If no tokens → purchase boost token package first
- 12. Optional: Run homepage ad using tokens (if you have tokens):
 - Choose ad position (top banner, sidebar, featured section)
 - Select duration (determines tokens needed: 2-8 tokens)
 - Upload banner creative
 - Use ad tokens from balance
 - Wait for admin approval
 - If no tokens → purchase ad token package first
- 13. Job goes live (boosted jobs appear prominently)
- 14. Receive applications
- 15. Assign applications to team members for review
- 16. Review applications in Kanban ATS (owner + team members)
- 17. Drag candidates through hiring stages
- 18. Schedule interviews (can be handled by assigned team members)
- 19. Communicate with candidates

Note: Free job post is one-time only. Subscribers get unlimited posting + included team seats. Additional team members beyond included seats require payment.

Team Member Flow (Interviewer/Recruiter)

1. Receive email invitation from employer
2. Click invitation link → Sign up or login
3. Accept invitation to join company team
4. Access team dashboard (limited based on permissions)
5. View assigned jobs
6. Review applications in Kanban board (only for assigned jobs)
7. Add notes, change candidate stages
8. Schedule interviews
9. Communicate with candidates (if permitted)
10. Cannot access: billing, company settings, team management, unassigned jobs
11. Login → Dashboard overview
12. Review pending SSM verifications (priority task)
 - View uploaded SSM certificates
 - Verify SSM number authenticity
 - Approve or reject with reason
13. Review pending homepage ads
 - Check banner creatives for inappropriate content
 - Verify ad links work correctly
 - Approve or reject ads
14. Monitor platform activity
15. Review flagged content (jobs and ads)
16. Manage users (suspend/delete if needed)
17. Generate reports (revenue, ad performance, user activity)
18. Configure platform settings (boost prices, ad slots, payment options)

6. Technical Requirements

Frontend

- Responsive design (mobile, tablet, desktop)
- Modern UI framework (React, Vue, or Angular)
- Drag-and-drop library (react-beautiful-dnd, dnd-kit, or SortableJS for Kanban)
- Real-time notifications (WebSocket or Pusher)
- File upload functionality (resume, images, documents)
- Calendar integration (FullCalendar or similar)
- Progressive Web App (PWA) capabilities:
 - Offline mode (view saved jobs, drafts)
 - Add to home screen
 - Push notifications support
- Accessibility (WCAG 2.1 compliance):
 - Screen reader support
 - Keyboard navigation
 - Color contrast standards
 - Alt text for images
- Multi-language support (Phase 2):
 - English and Bahasa Malaysia
 - RTL support if needed
- Performance optimization:
 - Lazy loading
 - Image optimization
 - Code splitting
 - CDN for static assets

Backend

- RESTful API or GraphQL
- Authentication & authorization (JWT)
- File storage (AWS S3, Cloudinary)
- Search functionality (Elasticsearch recommended)
- Email service integration (SendGrid, AWS SES)
- SMS service (Twilio, AWS SNS for Malaysian numbers)
- Payment gateway integration:
 - Malaysian options: iPay88, Billplz, Senangpay
 - International: Stripe (supports FPX, cards, e-wallets)
 - Support for: Credit/debit cards, FPX (online banking), Touch 'n Go, GrabPay, Boost
- Background job processing (Redis Queue, Celery):
 - Send batch emails
 - Process resume parsing
 - Generate reports
 - Clean up expired jobs
- Caching (Redis):
 - Cache frequently accessed data
 - Session storage
 - Rate limiting
- Database:
 - PostgreSQL or MySQL (primary)
 - Read replicas for scalability

- Regular backups (automated daily)
 - Point-in-time recovery
- Monitoring & Logging:
 - Application monitoring (New Relic, Datadog)
 - Error tracking (Sentry)
 - Log aggregation (ELK stack)
 - Uptime monitoring
- API Rate Limiting:
 - Per user/IP limits
 - Different limits for different user tiers

Security

- HTTPS only
 - Password encryption (bcrypt)
 - SQL injection prevention
 - XSS protection
 - Rate limiting on API endpoints
 - GDPR compliance (data privacy)
 - PDPA Compliance (Malaysia Personal Data Protection Act):
 - User consent for data collection
 - Right to access personal data
 - Right to correct personal data
 - Right to delete personal data (account deletion)
 - Data retention policies
 - Privacy policy and terms of service
 - PCI DSS compliance for payment processing (use payment gateway SDK to avoid storing card data)
 - Secure payment flow: Use tokenization, never store card details directly
 - Two-factor authentication (optional for users, mandatory for super admin)
 - Session management: Auto-logout after inactivity
 - Password policies: Minimum length, complexity requirements
 - API security: JWT tokens, refresh tokens, token expiration
-

7. Pricing Strategy (Example for Malaysia)

Free Job Post

- First Job Post: FREE (one-time, after SSM verification)
- Encourages employer sign-ups and platform trial

Job Posting (Pay-Per-Job)

- Single Job Post: RM 99 (30 days listing)
- 5 Jobs Bundle: RM 450 (RM 90/job, save 10%)
- 10 Jobs Bundle: RM 800 (RM 80/job, save 19%)
- Bundle valid for 6 months

Boost Token Packages (Pre-purchase)

- 5 Boost Tokens: RM 199 (RM 39.80/token, save 20%)
- 10 Boost Tokens: RM 349 (RM 34.90/token, save 30%)
- 20 Boost Tokens: RM 599 (RM 29.95/token, save 40%)
- Tokens valid for 12 months

Boost Token Usage

- Featured Badge: 1 boost token (14 days)
- Urgent Hiring Tag: 1 boost token (7 days)
- Highlighted Background: 1 boost token (14 days)
- Combo Boost (all 3): 2 boost tokens (14 days, save 1 token)

Ad Token Packages (Pre-purchase)

- 5 Ad Tokens: RM 299
- 10 Ad Tokens: RM 549 (save RM 50)
- 20 Ad Tokens: RM 999 (save RM 150)
- Tokens valid for 12 months

Ad Token Usage

- Top Banner (1920x200px):
 - 7 days: 3 ad tokens
 - 14 days: 5 ad tokens
 - 30 days: 8 ad tokens
- Sidebar Banner (300x600px):
 - 7 days: 2 ad tokens
 - 14 days: 3 ad tokens
 - 30 days: 5 ad tokens
- Featured Company Section:
 - 30 days: 4 ad tokens

Subscription Plans (Monthly Billing)

- Starter: RM 499/month
 - UNLIMITED job posting
 - 1 user included (owner)
 - 3 boost tokens/month
 - Basic ATS
 - Email support
 - Additional users: +RM 49/user/month
- Professional: RM 999/month
 - UNLIMITED job posting
 - 3 users included
 - 10 boost tokens/month
 - 5 ad tokens/month
 - Advanced ATS with Kanban
 - Team collaboration features
 - Priority support

- Additional users: +RM 39/user/month
- Enterprise: RM 1,999/month
 - UNLIMITED job posting
 - 10 users included
 - 25 boost tokens/month
 - 15 ad tokens/month
 - Full ATS suite with Kanban
 - Advanced team management
 - Role-based permissions

11. Key Metrics to Track

For Platform

- Total users (employers vs job seekers vs team members)
- Active jobs
- Application rate
- Time-to-hire
- User retention
- Revenue breakdown:
 - Job posting revenue (direct payments + bundles)
 - Boost token sales
 - Ad token sales
 - Team member seat revenue
 - MRR (Monthly Recurring Revenue from subscriptions)
- Token metrics:
 - Token purchase rate
 - Token redemption rate (how many tokens actually used)
 - Average tokens per employer
 - Token expiry rate
- Team metrics:
 - Average team size per employer
 - Team member adoption rate
 - Revenue per team member
- Payment conversion rate (SSM verified → purchased job post)
- Average transaction value
- Subscription churn rate
- Boost adoption rate (% of jobs with boosts)
- Ad inventory utilization (% of ad slots filled)

For Employers

- Job views
- Applications per job
- Candidate quality score

- ROI per job post
- Boost effectiveness (views/applications increase with boost)
- Ad performance (CTR, impressions, conversions)
- Team productivity: Applications reviewed per team member, time to review

For Job Seekers

- Profile views
- Application success rate
- Response time from employers
